3. Once the download has finished, click “open” or locate the software icon on your desktop and double click it to start installation.
4. During installation you will see this code page.

5. Check your email and enter the code sent to you. (You can Cut and Paste)
6. Then click next and finish the install.
7. To Start the Application:
 - a. Automatically – reboot and wait five minutes, which will allow your computer to automatically start the application and send the initial IP Address to the servers.
 - b. Manually – go to the start menu, choose all programs, EasyIPfinder , then click on the Easy IP Finder button.
8. Once you have started the program you can go to www.easyipfinder.com from any computer then click on “remote lookup” and enter your username and password to get your current IP Address.

Thanks for using our software.
